“Protect Your Investment”

Brake Fluid DOT 4

The True Brand DOT 4 Brake Fluid has a high quality base with a low moisture absorption rate which provides excellent rust and corrosion protection for all metals throughout a vehicle's braking system. True Brand's DOT 4 Brake Fluid is formulated to help maximize ABS performance while meeting and / or exceeding the requirements for both DOT 3 and DOT 4 brake fluid specifications.

True Brand DOT 4 Brake Fluid can be used with all ABS, drum or disc brake systems as well as hydraulic clutches requiring DOT 3 or DOT 4 fluid.

Truth - Application / Directions

- Follow Directions on Brake Fluid Exchange Machine
- Recommended to exchange every 30,000 miles for “Best Results” or when factory recommended.

Truth - Features / Benefits

Formulated to help protect systems against pump breakdown caused by wear, oxidation and foaming. When taking the time to help maintain your customers vehicle with True Brand Brake Fluid you will also help reduce the possibility of fluid vaporization and eventual brake failure as a result of vapor lock by maintaining a high wet boiling point.

“Protect Your Customers Investment with Preventative Maintenance.”

High Heat Protection
Prolongs Fluid Life
Protects Metal

- For all ABS, drum or disc brake systems including hydraulic and disc brakes requiring DOT 3 or DOT 4 fluid
- High, dry boiling point up to 500 degrees F
- Reduce the risk of fluid evaporation and possible brake failure
- Low-moisture absorption rate formula providing excellent vapor lock protection
- Maximizes ABS performance
