Transmission Treatment with “PTFE”

“For Professional Use ONLY”

True Brand® Transmission **Treatment** contains the highest quality base oils with “PTFE” . “PTFE” is noted as the slickest substance known to man which when put inside your vehicle it will reduce friction causing **less heat, less wear, and less work** for all working components.

True Brand® Transmission **Treatment** contains a deter-gent package that will fortify ATF against oxidation, acid formation and breakdown due to thermal stress. True Brand® Transmission Treatment Contains shear-resistant viscosity **stabilizers** and pour-point depressants for **cold-weather operation**.

Truth - Application / Directions

- Add to transmission at each service or when needed.

Truth - Features / Benefits

Protect your customers Transmission with “PTFE”. **Save** them **money** with True Brand® Transmission Treatment. Remember with Regular Preventative Maintenance you may **save** on major repair cost and the possibility of a transmission replacement.
